

INDUSTRIA DE FORTIFICACIÓN MINERA

# Corrugated SHEETS

## Product Description

Our corrugated sheets are manufactured in various formats according to customer specifications regarding thickness, width, and length. Each sheet is produced under strict quality control standards, ensuring consistency and performance across all applications.

## Presentation

Available in various profile types such as **corrugated, wavy, and trapezoidal**, our sheets are manufactured in **different thicknesses and lengths**, based on customer requirements.

## Chemical Composition and Mechanical Properties

Typical analysis %

Estándar / grade	Carbon (C) %	Phosphorus (P) %	Sulfur (S) %	Silicon (Si) %	Yield Strength (MPa)	Tensile Strength (MPa)	Elongation %
ASTM A36	0.26	0.04	0.05	0.40	250	400	18

## Product Dimensions

Our corrugated sheets are manufactured in a variety of widths and lengths, based on customer requirements. The surface profile is also tailored to the design specifications provided. Typically, three surface types are offered: Wavy Corrugated Sheet, Trapezoidal Corrugated Sheet, Triangular, Corrugated Sheet

Wavy Corrugated Sheet  
Material: ASTM A36 Steel  
Dimensions: As per customer requirements

Trapezoidal Corrugated Sheet  
Material: ASTM A36 Steel  
Dimensions: According to customer
